## ***The Kidnapping Of Babies & Children Goes Mainstream!***

By J. Speer-Williams  
6-17-15

Did you know that our babies and children are being kidnapped all over America?

By using our government, a sinister force has been assaulting the most vulnerable of us our children and babies.

You see, there is an entire federal agency with the misleading title of *Child Protective Services (CPS)* that is dedicated to kidnapping and then heavily drugging our children and even our babies.

The government-enforced schools of substandard education and outright indoctrination, numerous mandated toxic vaccines, and mind-numbing TV shows for children were not enough to effect the purpose of destroying our youth and future.

These dark ones wanted something more. With US taxpayers paying the freight for their own demise, the dark ones designed a plan to destroy our families by separating children and babies from their parents.

Fortunately, with the courageous whistleblowers from the inside, we can learn much about the hidden destruction of America.

From the brave whistleblower Carlos Morales, we get a close-up look at the evil workings of the federal agency known as Child Protective Services, where children and babies are stolen from hospitals, school buses, and even their own beds.

I quote from Mr. Morales' *YouTube* video entitled *Why We Must Fight Against Child Protective Services*.

*Hello, my name is Carlos Morales. I'm a former Child Protective Services (CPS) investigator. And this is a case against and the truth about Child Protective Services.*

*According to CPS and every state in America, the child does not belong to the parent. They actually belong to the state. The CPS is actually given the power by law to ignore or reject the first, second, fourth, fifth, sixth, seventh, eighth, and fourteenth amendments in their proceedings.*

*Now, on to how a case opens. A call is made to CPS headquarters of alleged abuse.*

*The caller can remain anonymous or they can state their actual name. But due to CPS [unconstitutional] bylaws, the alleged perpetrator will never be given the caller's name ... This is an infringement of the sixth amendment.*

As is well known by the engineers of the CPS monstrosity, such a bylaw will allow unprincipled people to lawfully and freely imperil

their neighbors with bogus reports without any negative consequences.

*The alleged abuse can be that a parent is allowing the child to play outside, that a child is being home-schooled, that the parent owns a gun legally, that the parent smokes marijuana outside the home, even if the patents are legally allowed to do it, that the child is being taught anti-government sentiments. It is then that an investigator is sent out to prove or disprove the claims.*

It should be noted here that many CPS caseworkers fabricate evidence and withhold evidence and are never disciplined when caught their pay raises and bonuses depend on such dishonestly. The majority of the CPS agency's employment pool always endeavors to keep taxpayers' dollars flooding to them, irrespective of the lives they destroy.

According to the *California Little Hoover Commission Report* thirty to seventy percent of the children in California group homes do not belong there and should not have been removed from their

parents' home.

*Now since the state owns the kid, and not the parents, the investigator can then go to the child's school (or anywhere else the kid is) without letting the parents know that the child is about to be questioned by some individual with terrible training.*

*Public schools are the go-to place for most investigators wanting to find, or talk to, or remove a child [from their home].*

*The investigator goes to the school, takes the child into a separate room [to be questioned].*

*According to CPS, four-year-olds are capable of consent and are fully capable of recalling events exactly as they occurred.*

*The investigators barrage the child with questions regarding any sexual promiscuity, drug use, violence, or molestation practices, and so on.*

*The children generally have very little idea of what the hell is going on, and this has led to countless false abuse charges across America.*

*What happens to keep this wretched agency cranking along are financial incentives [paid for by American taxpayers]. CPS allots money to the states for every allegation made, whether it's*

*proven true or false. In states like Texas, the state can be given six to ten thousand dollars for every removal of a child.*

*Now of course, attorneys and judges are also subsidized for every child that is put through the wringer, known as the system. And foster homes are propped up as well [with taxpayer money].*

*Foster homes are actually granted more money for every disability that a child has. Disability doesn't just mean they're crippled; it can also mean that a child has oppositional defiant disorder, mood swings, ADHD, insomnia, or anger issues, all of which are generally the by-product of a terrible environment. But instead of fixing the environment, the foster home is actually given bonuses.*

And there are a lot of bonuses to be had, considering the fact that the APA (American Psychiatric Association) has listed over 450 different mental disorders.

*This all leads to six-year-olds being put on six different kinds of psychotropic drugs.*

*Presently, there are 397,000 children now in foster homes, where they are seven to eight times more likely to be abused than children in their normal households.*

Once again, where the government intervenes in situations, conditions worsen dramatically. Most people pass this off as merely well-meant, well-intended incompetence. Few realize that government programs all have a sinister design, no matter how well the agendas are cloaked in benevolence.

Once informed of the villainy and gross malfeasance of the CPS, some Americans will claim it is all a simple series of unintended consequences. If that were true, serious reforms would have taken

place long ago. After all, since the late 1970s, governmental sponsored child protection services have spanned our country.

*Nearly half [of foster children] will end up homeless after they aged out [at age eighteen].*

*They [foster children] are three times more likely to be put on psychotropic drugs, due to the financial incentives already discussed.*

*They are seven times more likely to develop an eating disorder. They are more likely to have post traumatic stress disorder than veterans of war, and less likely to recover from that PTSD.*

*They [foster children] are more likely to become pregnant as teenagers ... and they are six times more likely to die than if they had stayed in an abusive household.*

In 1998, the *National Center on Child Abuse and Neglect* reported that six times as many children died in foster care than in the general public, and that once removed to official “safety,” these children are far more likely to suffer abuse, including molestation, than in the general population.

*When we put it all together, we have an unconstitutional and barbaric agency that gets away with [heavy] financially incentivized mass removal of kids, eighty-five percent removed for bogus reasons other than child abuse.*

*We have terribly trained investigators, horrendous evidence and gathering practices, families left poor just trying to disprove claims, whole justice systems that are financed through unjust practices, and foster homes that drug and abuse children.*

*Now that is the truth about Child Protective Services.*

Thank you, Mr. Carlos Morales, for your vital contributions to America's children, the protection of their families, and the viable future of our society.

All of the pieces of legislation that has resulted in today's CPS Agency were written in classified think tanks by unnamed and unknown authors.

And yet, all of that lengthy legislation was approved by various Congresses, signed into law by two presidents, and upheld by Supreme Courts all this even though it was always obvious that the CPS Agency would become a (taxpayer funded) racketeering scam that would legalize the kidnapping of American children and babies.

The secret cabal that has taken over our government, courts, media, and most other American institutions is attacking us all, either directly or indirectly.

This Luciferian cult has transformed many humans into being their minions, who then mimic subhuman behavior, which engulfs us all. This depraved influence is especially evident in large central governments, like the one we have in America.

This whole sordid CPS tale tells us of one of the many ways this satanic cult has pitted man against man to the overall detriment of us all.

It is the responsibility and God-given duty of every human being to resist this demonic power.
