

# **THE SECRET SHADOW GOVERNMENT**

## **A STRUCTURAL ANALYSIS**

By Richard Boylan Ph.D.

The secret "shadow" government is the large organisational network which operates alongside the officially elected and appointed government of the United States of America. Just as with the official government, the secret government has functional branches.

Just as with the official government, the Shadow Government has functional branches. However, unlike the official government, the purpose of the non-executive branches of the Shadow Government is simply to distribute various functions, but not to achieve a system of checks and balances, as was supposed to happen constitutionally between the executive, legislative and judicial branches of the U.S. Government. That is because the Shadow Government is a creature of a powerful elite, who need not fear being dominated by an instrument of their own creation.

In the Shadow Government five branches may be identified. These branches are: the Executive Branch, the Intelligence Branch, the War Department, the Weapons Industry Branch, and the Financial Department.

The reporting lines of the Intelligence Branch and the War Department to the Executive Branch are straightforward and obvious. Intelligence exists to provide the Executive Branch with sufficient necessary information to make adequately informed policy decisions. The War Department exists to provide coercive force to carry out Executive policy decisions which could meet with public resistance. The Special Operations units within the Intelligence Branch and War Department exist to carry out policy directives requiring covert action and official deniability.

The Weapons Industry Branch reports to the Executive Branch most often indirectly, through the War Department and/or the Intelligence Branch (for Black Budget weapons systems).

The Financial Department theoretically reports to the Executive Branch for fiscal policy implementation, but de facto also reports directly to the international power brokers who have created the Shadow Government. The Financial Department serves at times directly as their instrument of fiscal policy implementation.

An analysis of the overall purposes of these five branches suggests that the overall purpose of the Shadow Government is to exercise covert control by:

1. Collecting comprehensive institutional and personal information
2. By establishing national and international policy independently of the established Government
3. By developing high-tech arms and equipment, and, with these, establishing small, specialized, highly mobile, elite military units to effect these covert policies, when need arises, without having to rely on the official (and "unreliable") Armed Services, (whose subservience to the Shadow Government is reasonably suspect)
4. By developing an armed capability to repel any threat to the status quo, (including the uncertain ontological, social, and economic impacts of any

- revelation of the reality of UFO and extraterrestrial presence) through the development of a Star Wars/BMD ground and space-based surveillance and SDI weapons network
5. By denying information compromising to the Shadow Government from all those outside "need-to-know" policy-making levels
  6. By exercising control on the money supply, availability of credit, and the worth of money, through policy decisions made outside of the official Government
